AMENDMENT UNDER 37 C.F.R. § 1.111

Commissioner for Patents
P.O. Box 1450

Sir:

In response to the Office Action dated February 11, 2003, please amend the above-identified application as follows:

IN THE SPECIFICATION:

The specification is changed as follows:

Please amend the paragraph bridging pages 2 and 3 as follows:

Incidentally, when a gradation image is recorded like this, each pixel is always recorded from a constant point (point "a" in Fig. 3B). Since the point "b" side in a single pixel width in the transferring direction becomes no-recorded portion, the recorded image becomes concentrated on the point "a" side as above. Therefore, when a formed two-dimensional image is viewed over its entirety, there occurs a drawback that the image becomes conspicuously coarse.

Please amend page 11, 2nd full paragraph as follows:
